ABOUT THE COVER DRAWING

This is a drawing of a portion of the Huntington Library and Art Gallery in San Marino, CA. The botanical gardens in which this library is situated was begun in 1906 and the first camellias planted there in 1909. It is one of those **must** places for camellia lovers who visit the Los Angeles area. At one time, this garden held the most extensive collection of camellias in the country. It still has few peers.
